

AINDA Energía & Infraestructura S.A.P.I. de C.V. Announces Support for the Task Force on Climate-related Financial Disclosures

AINDA Energía & Infraestructura joins more than 2,000 organizations around the world in publicly supporting the TCFD recommendations

04/22/2021 – Today, Energía & Infraestructura S.A.P.I. de C.V. declared its support for the Task Force on Climate-related Financial Disclosures (TCFD), joining more than 2,000 organizations in demonstrating a commitment to building a more resilient financial system and safeguarding against climate risk through better disclosures.

The TCFD, chaired by Michael R. Bloomberg, founder of Bloomberg LP and Bloomberg Philanthropies, provides market participants with recommendations to address the financial impact of climate change on their business. By increasing transparency on financially material climate-related risks and opportunities the recommendations promote more informed financial decision-making by investors, lenders and others.

Supporters of the TCFD span the public and private sectors and include national governments, central banks, stock exchanges, credit rating agencies, financial organizations and private sector businesses from a variety of industries.

“As an investor in energy and infrastructure projects, it is very important to understand and contribute to mitigating the potential risks that climate change can have on our projects. That is why AINDA Energía & Infraestructura has decided to support the implementation of the theoretical framework developed by the FSB Task Force on Climate-related Financial Disclosures (TCFD) for the reporting of information related to the impact of climate change on the management of investment portfolios.”

Manuel Rodríguez Arregui – CEO AINDA Energía & Infraestructura

Widespread implementation of the TCFD recommendations will provide investors, lenders and insurance underwriters with consistent and relevant information to understand the economic risks and opportunities resulting from climate change. Increased disclosures in line with the recommendations across sectors and geographies will help global markets make more efficient capital allocation decisions and adjust appropriately to the disruptive effects of global climate change.

Implementing the TCFD recommendations provides companies

with:

- Easier or better access to capital by increasing investors' and lenders' confidence that climate-related risks are appropriately assessed and managed,
- Better ability to meet existing disclosure requirements by reporting material information in financial filings,
- Increased awareness and understanding of climate-related risks and opportunities, resulting in better risk management and more informed strategic planning, and
- The ability to proactively address investors' demand for climate-related information in a framework that investors are increasingly asking for.

About AINDA Energía & Infraestructura

AINDA Energía & Infraestructura manages a listed private equity fund (“CKD”) placed among institutional investors (Afores and government institutions) in the Mexican Stock Exchange on March 2018 with capital commitments of \$4,400 MM MXN (A Series) + co-investment rights of up to \$8,500 MM MXN (B Series).

AINDAs' investment guidelines include: (i) capital investments in new or stabilized energy and infrastructure projects with opportunity for growth and (ii) restructuring companies in the Mexican energy and infrastructure industry. For this, AINDA relies on a professional team with joint experience and in-depth knowledge in

private equity transactions in the energy and infrastructure sectors and a solid corporate governance that includes an Investment Committee and a CKD Board (Technical Committee) with world-class independent members with relevant experience in the industry. Additionally, AINDA strengthened its corporate governance through an equity stake in the GP from Grupo Proeza, a multinational conglomerate located in Monterrey.

AINDA is currently invested in two federal highway concessions and its pipeline includes projects in transportation, hydraulic infrastructure, renewable and fossil fuels electricity power generation, as well as in the midstream and upstream sectors.

About the Task Force on Climate-related Financial Disclosures

On December 4, 2015, the Financial Stability Board (FSB) established the industry-led Task Force on Climate-related Financial Disclosures (TCFD) with Michael R. Bloomberg as Chair. The Task Force currently has four Vice Chairs and 31 members in total. The TCFD was asked to develop voluntary, consistent climate-related financial disclosures for use by companies in providing information to lenders, insurers, investors and other stakeholders, which were published in the TCFD Recommendations Report on June 29, 2017. More information about the TCFD can be found at www.fsb-tcf.org.
